

CLEAR LENS

FOR NORMAL USE

The Pinlock fog free insert lens is created out of a moisture absorbing plastic. The Pinlock creates an air tight double shield. These two features make Pinlock the best fog free system there is.

The Pinlock is placed between two adjustable eccentric pins. Fitting is easy and the system is interchangeable.

Daytime use only. Never use Pinlock lens at night.

Close your shield and don't stop breathing.

A UNIQUE SYSTEM

- The most effective fog free solution available.
- 100% UV protection.
- Full face field of vision.
- Lens has a dry silicone seal and uses no glue.
- Easy to interchange.
- Easy to clean.
- Crystal clear lens for a perfect view.
- A great improvement for personal safety.
- Test winner in European and US Motorcycle magazines.
- Used by Moto GP riders.
